HAMMAD GUL

MERN STACK DEVELOPER · FULL STACK WEB DEVELOPER

ABOUT ME

Hi, I'm Hammad Gul — a MERN Stack Developer who loves building real, functional web applications. I work with MongoDB, Express.js, React.js, and Node.js and I'm comfortable on both frontend and backend — REST APIs, JWT auth, database design, and responsive UI. Over the past 2+ years I've been learning by doing — building projects, breaking things, and figuring them out. I focus on writing clean code and delivering things that actually work.

EDUCATION

B.Sc. Computer Engineering

University of Engineering & Technology (UET), Peshawar
2024 – 2028 · 4th Semester
